

**EPPO Network of experts
working on surveillance, monitoring,
and control of Emerald ash borer,
Agrilus planipennis in Europe**

Agrilus planipennis (AGRLPL) - <https://gd.eppo.int>

In October 2022, the EPPO Panel on Quarantine Pests for Forestry decided to organize a Network of experts working on surveillance, monitoring, and control of Emerald ash borer, *Agrilus planipennis* in Europe.

The objective: to exchange data on monitoring and to get a better understanding of the current distribution and spread of this pest in the EPPO region.

In October 2022, the EPPO Panel on Quarantine Pests for Forestry decided to organize a Network of experts working on surveillance, monitoring, and control of Emerald ash borer, *Agrilus planipennis* in Europe.

- a web page for the Network is launched,
- the work will be mostly in a form of exchange of information in monthly newsletters,
- a video meeting will be organized when we have sufficient coverage,
- a physical workshop will be organized when the geopolitical situation in the region allows it.

Network of experts working on surveillance, monitoring, and control of *Agrilus planipennis* (Emerald ash borer)
- Call for participation (April 2023) -

In October 2022, the EPPO Panel on Quarantine Pests for Forestry decided to establish a network of experts working on surveillance, monitoring, and control of *Agrilus planipennis* (Coleoptera: Buprestidae - Emerald ash borer). This network will be established in association with an EPPO-EU project (Grant agreement SANTE/2020/G1/EPPO/S12.823766).

Trap - Courtesy: Dominic Eyre

Objective and scope of the network

The objective of this network is to exchange data on monitoring and to get a better understanding of the current distribution and spread of *A. planipennis* in the EPPO region. Moreover, information on effective trapping and management options could be shared. The network will focus on the EPPO region, however members from other regions are also welcome as significant knowledge on the pest biology, as well as experience on monitoring and control have been gathered in other parts of the world.

In October 2022, the EPPO Panel on Quarantine Pests for Forestry decided to organize a Network of experts working on surveillance, monitoring, and control of Emerald ash borer, *Agrilus planipennis* in Europe.
